Map outlining progress toward meeting plan targets attached. Homes with FTTH are included in the map. The five year plan currently projects facilities to all but the most remote areas that do not currently have access to broadband download speeds of at least 10 megabits in Nevada. This is being accomplished via a replacement of current copper infrastructure with fiber and/or wireless facilities. The map shows completed fiber projects to date.

Explanation: Filer Mutual Telephone Company is using Universal Service funds for capital expenditures to replace existing copper infrastructure that is unable to deliver the bandwidth that our customers need to meet the growing demand for increased speed and capacity. This will also reduce troubles related to older copper plant and allow for increased quality of service to our existing customers. The operational expenses are used to meet our customers need for high quality, local, and responsive customer service, along with the administrative and maintenance expenses of our existing network. Universal service funds are not specifically tied to any individual capital or expense item. As we add new subdivisions and provide service to new customers, Universal Service funds help us reach out to these new areas. Therefore, Universal Service Fund support is a key component of the overall regulated operating and expense funding that allows Filer Mutual Telephone Company to continue to provide the advanced services that our customers deserve.
